

Incident Management Situation Report
Friday, May 30, 2025 – 0730 MDT
National Preparedness Level 2

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (93 fires)
New large incidents:	3
Large fires contained:	1
Uncontained large fires:	9
CIMTs committed:	0
Type 1 IMTs committed:	0
NIMOs committed:	1

Nationally, there is one fire being managed under a strategy other than full suppression.
 Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	20,850
Acres (2015 – 2024 as of today)	1,151,434

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Hot, well above normal temperatures are expected across California into much of the West through Saturday along with low minimum relative humidity of 5-20%. Isolated mixed wet and dry thunderstorms will develop near and west of the Divide in New Mexico into eastern Arizona, with potential new ignitions Friday and Saturday. Breezy westerly Cascade Gap winds gusting to 50 mph will develop on the east slopes of the Cascades into the Columbia Basin creating areas of elevated to critical conditions Saturday. Cooler temperatures are expected across the northern half of the West Sunday as a cold front moves through. Farther south, an upper-level low with tropical moisture will move into the Southwest with widespread showers and thunderstorms Sunday, while scattered wet thunderstorms are expected in southern California. Dry and breezy northwest winds will develop in the Upper Midwest today, followed by very dry conditions with minimum relative humidity as low as 10% for the weekend, but winds will diminish. Showers and thunderstorms are expected from the Appalachians to the East Coast today, followed by drier conditions for the weekend. A drier trend is expected across Alaska, but temperatures are expected to remain near normal.
