

**Incident Management Situation Report
Friday, November 21, 2025 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (November 14, 2025 – November 20, 2025):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (818 fires)
New large incidents:	20
Large fires contained:	19
Uncontained large fires:	8
CIMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

Fire Activity and Teams Assigned

Totals

New fires:	770
New large incidents:	14
Uncontained large fires:	5

* **Cracker**, Virginia DOF. Five miles north of Pennington Gap, VA. Timber. Minimal fire behavior. Last report unless significant activity occurs.

* **Rubotton**, Chikasa Agency, BIA. Five miles northwest of Leon, OK. Grass. Moderate fire behavior with backing. Last report unless significant activity occurs.

* **Chimney Rock Ridge**, Kentucky DOF. Started on private land nine miles south of Monticello, KY. Timber and hardwood litter. Minimal fire behavior with smoldering. Last report unless significant activity occurs.

* **Culp Lake**, Georgia Forestry Commission. Twelve miles southwest of Cedar Town, GA. Hardwood litter and timber. Minimal fire behavior. Last report unless significant activity occurs.

* **Concord**, Alabama Forestry Commission. Six miles northwest of Talladega, AL. Brush. Minimal fire behavior. Last report unless significant activity occurs.

TOTAL ACRES:		206,915	1,525,702	37,040	109,221	1,922,359	1,119,799	4,921,035

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	53,701
Acres (2015 – 2024 as of today)	7,012,455

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

A cold front will move through the Ohio Valley, Mid-Atlantic, and Southeast through tomorrow, with light rain and cooler temperatures behind the front. Meanwhile, an upper-level low will move through southern California and the Southwest with showers and high-elevation snow. As the low moves into the southern Plains Sunday and Monday, heavy rain with potential flooding is expected across much of central and eastern Oklahoma and Texas into the Lower Mississippi, Lower Ohio, and Tennessee Valleys. Lighter rain will spread north and east into the Appalachians and East Coast mid-next week. Behind the low, dry conditions are expected across the West into much of next week with an upper-level ridge except for a weak atmospheric river moving into the Northwest Sunday and Monday with rain and high elevation snow for Washington and the northern Rockies. Dry conditions are expected across much of the northern Plains and Upper Midwest through next Friday, with temperatures well above normal through Tuesday before cooling. Light snow will continue across portions of Alaska today before colder and drier air arrives this weekend into mid-next week. Light to moderate trade winds are expected across Hawai'i next week, with generally dry conditions except for a few light windward showers.
