

**Incident Management Situation Report**  
**Thursday, October 2, 2025 – 0730 MDT**  
**National Preparedness Level 2**

**National Fire Activity:**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (38 fires)
New large incidents:	0
Large fires contained:	0
Uncontained large fires:	12
CIMTs committed:	3
NIMOs committed:	0

Nationally, there are two fires being managed under a strategy other than full suppression. Zero fires are in Alaska. Two fires are in the Lower 48.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

**This report will be posted Monday – Friday at 0730 Mountain Time unless significant activity occurs.**

Four US Army HH-60 MEDEVAC Helicopters from the 1st Air Cavalry Brigade (Fort Hood, TX) have been deployed to California to support wildland fire operations nationally.

## **Predictive Services Discussion:**

Locally breezy winds are expected across portions of the southern Great Basin, central High Plains, and southeast Atlantic coast today, but otherwise winds will be light across much of the US. Above normal temperatures are expected on much of the Plains to the Mississippi Valley and Great Lakes today, with temperatures 15-25°F above normal in the northern Plains to western Great Lakes. Relative humidity will remain low on the High Plains today, with minima of 12-20%, and locally low humidity will also occur in the Lower Great Lakes, as low as 20-25%. Scattered showers and isolated thunderstorms will continue in the northwestern US, and a band of moderate to heavy rain is expected to develop tonight from the central Sierra into central Idaho. Isolated showers and thunderstorms are likely along the Gulf Coast, with more scattered thunderstorms in Florida, where heavy rain is possible along the east coast. Scattered mixed rain and snow showers are expected in much of the southern half of Alaska, with light sea breezes and scattered showers in Hawai'i.
