

**Incident Management Situation Report
Friday, October 24, 2025 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (October 17, 2025 – October 23, 2025):

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (455 fires)
New large incidents:	2
Large fires contained:	3
Uncontained large fires:	3
CIMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel
AICC	0	0	0	0	0	0	0
NWCC	5	111,321	3	0	1	523	-1457

Total	16	175,340	3	9	1	666	-1,937

Northwest Area (PL 1)**Fire Activity and Teams Assigned** **Totals**

New fires: 8
 New large incidents: 0
 Uncontained large fires: 3

Labor Mountain, Okanogan-Wenatchee NF, USFS. Ten miles north of Cle Elum, WA. Timber and brush. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Last report unless significant activity occurs.

Lower Sugarloaf, Okanogan-Wenatchee NF, USFS. Twelve miles northeast of Leavenworth, WA. Grass, brush and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Last report unless significant activity occurs.

Moon Complex, Rogue River-Siskiyou NF, USFS. Eleven miles northeast of Agness, OR. Closed timber litter and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Last report unless significant activity occurs.

TOTAL FIRES:		2,937	2,139	211	416	44,772	6,280	56,755
TOTAL ACRES:		201,605	1,518,068	34,132	109,139	1,892,815	1,105,309	4,861,067

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	49,600
Acres (2015 – 2024 as of today)	6,868,711

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

An upper-level low will move into the southern Plains this weekend bringing widespread moderate to heavy rain to the southern Plains and Lower Mississippi Valley, although portions of the High Plains will receive only light precipitation. As the low moves east, it will weaken and widespread wetting rain into the Southeast is uncertain. A cold front is also expected to move through the northern Plains this weekend then through the Great Lakes and into the Northeast into mid-next week. Areas of wetting rain are anticipated, but rainfall in the Great Lakes and Upper Ohio Valley is more uncertain. Heavier rainfall is possible in the Northeast, especially if weak to moderate surface low pressure develops near the coast.

A strong atmospheric river will move into the Pacific Northwest this weekend, bringing heavy rain from the Cascades to the coast, with light to moderate precipitation into the northern Intermountain West. Snow levels will be high initially at above 7,000 feet, but fall to 3,000 to 5,000 feet Sunday. Upper-level ridging is expected to build across the West next week bringing warmer and drier conditions. Periods of showers are expected near coastal Alaska into next week, but most showers will be light. Colder temperatures are expected across the Interior next week under clear skies after scattered light snow shower today. Strong and dry trade winds are expected across Hawai'i into tomorrow creating critical conditions for lee side and drought stricken areas. A weakening of the trades and an increase in atmospheric moisture will lead to increased showers early next week, especially for the eastern islands.
