

**Incident Management Situation Report
Thursday, September 4, 2025 – 0730 MDT
National Preparedness Level 4**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (164 fires)
New large incidents:	8
Large fires contained:	0
Uncontained large fires:	57
CIMTs committed:	20
NIMOs committed:	0

Nationally, there are 10 fires being managed under a strategy other than full suppression. Zero fires are in Alaska. Ten fires are in the Lower 48.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Isolated to scattered mixed wet and dry thunderstorms will develop across the Oregon Cascades and eastern Oregon south into northern Nevada and northeast Oregon. Hot, dry, and unstable conditions will persist across much of Washington into western Montana with relative humidity as low as 10% and poor overnight recovery for mid-slopes and ridges. Isolated, mainly dry, thunderstorms are possible along the east slopes of the Washington Cascades late in the afternoon. Scattered wet thunderstorms will develop in the southern Great Basin to Arizona and Four Corners.

A strong cold front will move through the northern Plains, with strong northwest winds 20–30 mph with gusts to 50 mph behind it and relative humidity as low as 25%. This front will also create locally breezy northeast winds west of the Continental Divide in western Montana. Scattered to widespread showers and thunderstorms are expected ahead of the front in the Great Lakes to the central Appalachians and New York. Freezing temperatures and areas of front are expected overnight in northern Minnesota and the Upper Great Lakes. Scattered showers and thunderstorms will persist in Florida while dry conditions continue in the rest of the Southeast.
