

**Incident Management Situation Report
Saturday, September 13, 2025 – 0730 MDT
National Preparedness Level 3**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (80 fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires:	47
CIMTs committed:	15
NIMOs committed:	0

Nationally, there are four fires being managed under a strategy other than full suppression. Zero fires are in Alaska. Four fires are in the Lower 48.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

Six US Army HH-60 MEDEVAC Helicopters from the 1st Air Cavalry Brigade (Fort Hood, TX) have been deployed to California to support wildland fire operations nationally.

Predictive Services Discussion:

Cool temperatures, higher RH and widespread showers and thunderstorms continue across the eastern Great Basin, the Rockies and northern and central Plains to New Mexico and West Texas, with thunderstorms continuing overnight. Thunderstorms will remain more isolated in western Montana and the northern Great Basin and will diminish later in the evening. Warmer and drier weather returns briefly to the Northwest, California, and the western Great Basin. Showers ahead of the next Pacific low may move into the coastal Northwest late Saturday night. The drying trend will continue in the East with well above normal temperatures from the eastern Plains to the Mid-Atlantic, and near-record temperatures in the Mississippi Valley with an increase in initial attack possible. RH of 10–20% and breezy south winds 20–30 mph are expected from West Texas north into the central Plains with elevated concerns. A cold front from Canada will move through the Great Lakes on Saturday, with isolated showers possible in the southern Great Lakes to the Ohio Valley. Isolated dry thunderstorms may also develop in the lower Mississippi Valley with strong heating. Scattered showers and thunderstorms will continue across Florida.
