

**Incident Management Situation Report
Tuesday April 7, 2026 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (48 fires)
New large incidents:	1
Large fires contained:	3
Uncontained large fires:	11
CIMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

Southern Area (PL 3)

Fire Activity and Teams Assigned

Totals

New fires:	14
New large incidents:	1
Uncontained large fires:	10

Hilux, Big Cypress National Preserve, NPS. Five miles southeast of Miles City, FL. Southern rough and timber. Moderate fire behavior with running and backing. Numerous structures threatened.

Sargent, National Forests in Florida, USFS. One mile south of Sargent, FL. Southern rough. Minimal fire behavior with creeping and backing. Railroad infrastructure threatened. Reduction in acreage due to more accurate mapping.

* **Etterle Rd**, Georgia Forestry Commission. Five miles north of Blythe, GA. Timber. Active fire behavior with flanking and creeping.

139, National Forests in Florida, USFS. One mile north of Wilma, FL. Southern rough. Minimal fire behavior with backing, creeping and smoldering.

Mill Pond, National Forests in Florida, USFS. Three miles south of Telogia, FL. Southern rough and grass. Minimal fire behavior with smoldering. Precipitation occurred over the fire area yesterday.

Slover Rd, Georgia Forestry Commission. Four miles southwest of Jesup, GA. Southern rough and timber. Minimal fire behavior with smoldering and creeping.

Woodlawn, Francis Marion & Sumter NF, USFS. Six miles north of Evans, SC. Timber and grass. Minimal fire behavior. Precipitation occurred over the fire area yesterday.

Double Pine, Oklahoma DOF. Two miles northwest of Muldrow, OK. Heavy slash. Minimal fire behavior.

Troupville Again, Georgia Forestry Commission. Two miles west of Valdosta, GA. Timber. Minimal fire behavior with smoldering. Last report unless significant activity occurs.

TOTAL ACRES:		57,509	1,467	9,221	25,858	1,473,721	91,653	1,659,429

Ten Year Average	Quantity
Fires (2016 – 2025 as of today)	11,734
Acres (2016 – 2025 as of today)	786,031

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Breezy northeast winds of 10-20 mph with gusts to 30 mph amid relative humidity of 8-30% will develop from the Piedmont to the Florida Panhandle creating elevated to critical conditions, with the strongest winds likely in South Georgia. Dry conditions will extend into the Appalachians and Lower Mississippi Valley, as well, but winds are forecast to be lighter, near 10 mph. Strong downslope westerly winds gusting to 50-90 mph will develop across Montana and Wyoming while above normal temperatures spread northward across much of the West. Light mixed precipitation will develop late this afternoon into tonight for the northern Plains into the Upper Midwest, and scattered showers and thunderstorms will develop across New Mexico into the Colorado Rockies ahead of a weak upper-level low. Near normal temperatures will continue in Alaska, with scattered mixed precipitation for southwest and south-central Alaska. Winds will begin to become more southerly in Hawai'i today, drawing tropical moisture northward with an increase in showers.
