

**Incident Management Situation Report  
Wednesday April 8, 2026 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (82 fires)
New large incidents:	4
Large fires contained:	1
Uncontained large fires:	13
CIMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

### Southern Area (PL 3)

#### Fire Activity and Teams Assigned

#### Totals

New fires:	19
New large incidents:	3
Uncontained large fires:	11

**Hilux**, Big Cypress National Preserve, NPS. Five miles southeast of Miles City, FL. Southern rough and timber. Moderate fire behavior. Numerous structures threatened.

**Sargent**, National Forests in Florida, USFS. One mile south of Sargent, FL. Southern rough. Minimal fire behavior with smoldering and creeping. Railroad infrastructure threatened. Reduction in acreage due to more accurate mapping. Precipitation occurred over the fire area yesterday.

\* **Williams Creek**, National Forests in Alabama, USFS. Fourteen miles southeast of Centreville, AL. Timber, brush and heavy slash. Active fire behavior with uphill runs and backing. Structures threatened.

\* **Mainline**, Texas A&M Forest Service. Four miles northeast of Yotaw, TX. Timber. Active fire behavior with short crown runs and running.

\* **Meadow View**, Lake Meredith National Recreation Area, NPS. Seventeen miles north of Amarillo, TX. Grass and brush. Active fire behavior with wind-driven runs.

**Etterle Rd**, Georgia Forestry Commission. Five miles north of Blythe, GA. Timber. Moderate fire behavior with wind-driven runs and torching.

**139**, National Forests in Florida, USFS. One mile north of Wilma, FL. Southern rough. Moderate fire behavior with backing and torching.

**Mill Pond**, National Forests in Florida, USFS. Three miles south of Telogia, FL. Southern rough and grass. Minimal fire behavior with smoldering.

**Double Pine**, Oklahoma DOF. Two miles northwest of Muldrow, OK. Heavy slash. No new information.

**Woodlawn**, Francis Marion & Sumter NF, USFS. Six miles north of Evans, SC. Timber and grass. No new information.

<b>Ten Year Average</b>	<b>Quantity</b>
<b>Fires (2016 – 2025 as of today)</b>	<b>11,929</b>
<b>Acres (2016 – 2025 as of today)</b>	<b>789,370</b>

**Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.**

## **Predictive Services Discussion:**

Breezy east to northeast winds of 10-20 mph with gusts to 30 mph amid relative humidity of 15-30% will develop from the Piedmont to the Florida Panhandle creating elevated to critical conditions. Dry conditions will extend into the southern Appalachians and Lower Mississippi Valley, as well, but winds are forecast to be lighter, near 10 mph. Breezy southerly winds 12-18 mph will also develop in the Upper Ohio Valley creating locally elevated conditions. Fast-moving low pressure will bring light precipitation to the northern Plains and Midwest, with strong, but moist, westerly winds developing across the Dakotas. Dry conditions will return to the Southwest as above normal temperatures persist across much of the West. Near normal temperatures will continue in Alaska, with scattered mixed precipitation across south-central Alaska and the central to eastern Interior. Breezy and moist southerly flow will bring periods of heavy showers and thunderstorms to Hawai'i, with localized flooding possible.
