

**Incident Management Situation Report
Thursday April 9, 2026 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (98 fires)
New large incidents:	0
Large fires contained:	1
Uncontained large fires:	10
CIMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel

SACC	34	25,979	8	63	7	535	7
Total	39	63,794	15	91	7	765	-44

Southern Area (PL 3)**Fire Activity and Teams Assigned****Totals**

New fires:	55
New large incidents:	0
Uncontained large fires:	9

Williams Creek, National Forests in Alabama, USFS. Fourteen miles southeast of Centreville, AL. Timber, brush and heavy slash. Active fire behavior with wind-driven runs, isolated torching and backing. Structures threatened.

Hilux, Big Cypress National Preserve, NPS. Five miles southeast of Miles City, FL. Southern rough and timber. Moderate fire behavior. Numerous structures threatened. Reduction in acreage due to more accurate mapping.

Sargent, National Forests in Florida, USFS. One mile south of Sargent, FL. Southern rough. Minimal fire behavior with smoldering. Railroad infrastructure threatened.

Mill Pond, National Forests in Florida, USFS. Three miles south of Telogia, FL. Southern rough and grass. Minimal fire behavior with smoldering.

Woodlawn, Francis Marion & Sumter NF, USFS. Six miles north of Evans, SC. Timber and grass. Minimal fire behavior. Last report unless significant activity occurs.

Etterle Rd, Georgia Forestry Commission. Five miles north of Blythe, GA. Timber. Minimal fire behavior with smoldering. Last report unless significant activity occurs.

Meadow View, Lake Meredith National Recreation Area, NPS. Seventeen miles north of Amarillo, TX. Grass and brush. Minimal fire behavior. Last report unless significant activity occurs.

139, National Forests in Florida, USFS. One mile north of Wilma, FL. Southern rough. No new information. Last narrative report unless new information is received.

Double Pine, Oklahoma DOF. Two miles northwest of Muldrow, OK. Heavy slash. No new information. Last narrative report unless new information is received.

TOTAL FIRES:		772	99	67	47	17,248	726	18,959
TOTAL ACRES:		60,608	1,469	9,401	25,858	1,501,258	91,867	1,690,460

Ten Year Average	Quantity
Fires (2016 – 2025 as of today)	12,048
Acres (2016 – 2025 as of today)	783,071

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Breezy southerly winds 12-20 mph with gusts to 30 mph will develop over Upstate New York and northern New England amid relative humidity of 20-30% creating locally elevated conditions. Another day of low afternoon relative humidity 15-30% is expected in the central and southern Appalachians, while other areas of the Southeast will see a modest increase in relative humidity easing the conditions. Scattered showers and thunderstorms will continue in Florida focused on the east coast but be less numerous than previous days. Elevated conditions will develop across portions of the southern High Plains from breezy south winds, with the lowest relative humidity west of the dry line in northeast New Mexico to eastern Colorado. In addition, isolated mixed wet and dry thunderstorms will develop near the dry line in the Texas Panhandle, with isolated dry thunderstorm possible along the Front Range into eastern Colorado. Above normal temperatures will continue in the West, while an upper-level low approaching the California coast brings scattered showers and thunderstorms to northern California, northern Nevada, and southwest Oregon. Near normal temperatures will continue in Alaska, with light mixed precipitation moving into western Alaska and the western Interior. Breezy south to southeast winds are expected across Hawai'i, with numerous showers and thunderstorms focused on Kauai and Oahu where localized flooding is possible.
