

**Incident Management Situation Report
Friday April 10, 2026 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (98 fires)
New large incidents:	4
Large fires contained:	2
Uncontained large fires:	8
CIMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel
AICC	0	0	0	0	0	0	0
NWCC	0	0	0	0	0	0	0

SACC	33	24,640	8	60	6	537	2
Total	38	63,366	15	89	6	768	3

Southern Area (PL 3)**Fire Activity and Teams Assigned****Totals**

New fires:	51
New large incidents:	3
Uncontained large fires:	8

Hilux, Big Cypress National Preserve, NPS. Five miles southeast of Miles City, FL. Southern rough and timber. Moderate fire behavior. Numerous structures threatened.

Williams Creek, National Forests in Alabama, USFS. Fourteen miles southeast of Centreville, AL. Timber, brush and heavy slash. Moderate fire behavior with backing, flanking and smoldering. Structures threatened.

* **Purple Monster**, Texas A&M Forest Service. Thirty-two miles northwest of Amarillo, TX. Brush and grass. Active fire behavior. Precipitation occurred over the fire area yesterday.

* **Rosindale Road**, North Carolina Forest Service. Eight miles north of Lake Waccamaw, NC. Southern rough. Moderate fire behavior with smoldering.

* **Peach Orchard Gap**, Oklahoma DOF. Ten miles southeast of Natural Dam, OK. Hardwood litter and brush. Moderate fire behavior.

Sargent, National Forests in Florida, USFS. One mile south of Sargent, FL. Southern rough. Minimal fire behavior with smoldering. Railroad infrastructure threatened.

139, National Forests in Florida, USFS. One mile north of Wilma, FL. Southern rough. Minimal fire behavior with backing and creeping.

Mill Pond, National Forests in Florida, USFS. Three miles south of Telogia, FL. Southern rough and grass. Minimal fire behavior with smoldering.

TOTAL FIRES:		800	103	68	51	17,338	742	19,102
TOTAL ACRES:		76,337	1,479	9,405	27,489	1,500,694	92,375	1,707,778

Ten Year Average	Quantity
Fires (2016 – 2025 as of today)	12,174
Acres (2016 – 2025 as of today)	788,185

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

An upper-level trough will move into the West this weekend, with precipitation spreading through the West Coast into the western Great Basin today. Precipitation will spread east into the northern and central Rockies while it continues along the West Coast this weekend. Breezy and dry southwesterly winds will precede the precipitation in the eastern Great Basin and central Rockies today with locally elevated conditions. Isolated mixed wet and dry thunderstorms will also develop today near the Continental Divide in the Southwest and be followed by breezy conditions this weekend. In the central and southern High Plains, isolated to scattered mainly wet thunderstorms will develop into Saturday, with breezy and very dry southwest winds expected Sunday, producing elevated to critical conditions for areas that receive little to no rainfall.

Farther east, showers and thunderstorms will develop on the eastern Plains into the Great Lakes this weekend. Much of the Appalachians and Southeast will be dry through the weekend with low afternoon relative humidity of 15-30% and locally poor overnight recovery for mid-slopes and ridges in the Appalachians. A cold front will move through the Northeast today, with the best chance of rain in northern New England, with dry conditions persisting for the Mid-Atlantic. In Alaska, near normal temperatures will continue, with scattered light mixed precipitation moving through the southern two-thirds of the state. A cold front will finish moving through the Hawai'ian Islands today with areas of heavy rain for Maui and the Big Island and strong southerly winds for all islands. A brief break is expected tomorrow before more wet conditions return to the islands Sunday.
