

**Incident Management Situation Report
Friday, February 6, 2026 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (January 30, 2026 – February 5, 2026):

| Fire Activity and Teams Assigned | Totals |
|---|-------------------|
| Initial attack activity: | Light (402 fires) |
| New large incidents: | 8 |
| Large fires contained: | 6 |
| Uncontained large fires: | 3 |
| CIMTs committed: | 1 |
| NIMOs committed: | 0 |

Nationally, there are zero fires being managed under a strategy other than full suppression.

Fires not managed under a full suppression strategy or fires managed under a full suppression strategy but utilizing a combination of tactics – such as monitoring, confinement or point zone protection – achieve specific fire management objectives while balancing the most effective utilization of resources. Fires managed as described above are identified in the situational report as Comp fires. Additional information including definitions can be found in the [NWCG glossary](#) or [here](#).

[Understanding the IMSR](#)

[IMSR Map](#)

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

| GACC | Incidents | Cumulative Acres | Crews | Engines | Helicopters | Total Personnel | Change in Personnel |
|--------------|------------------|-------------------------|--------------|----------------|--------------------|------------------------|----------------------------|
| AICC | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

| RMCC | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| EACC | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| SACC | 19 | 10,934 | 9 | 22 | 3 | 411 | 325 |
| Total | 20 | 10,934 | 9 | 22 | 3 | 414 | 322 |

Southern Area (PL 2)

Fire Activity and Teams Assigned

Totals

| | |
|--------------------------|-----|
| New fires: | 331 |
| New large incidents: | 8 |
| Uncontained large fires: | 3 |
| CIMTs committed: | 1 |

* **January Winter Storm – TN**, Federal Emergency Management Agency (FEMA). CIMT (SA Team 3). One mile east of Henderson, TN. Primary mission is to provide incident management support for saw modules/hand crews performing emergency road clearing in response to the impacts of Winter Storm Fern.

* **Pace**, Florida Forest Service. Five miles east of Interlachen, FL. Grass. Active fire behavior with flanking, group torching and long-range spotting. Road closures in effect. Reduction in acreage due to more accurate mapping.

* **Horseshoe Creek**, Florida Forest Service. Eight miles northeast of Mexico Beach, FL. Grass and southern rough. Moderate fire behavior with creeping. Precipitation occurred over the fire area yesterday.

* **US 1 South**, Florida Forest Service. Six miles southeast of Bunnell, FL. Timber. Active fire behavior with flanking.

| TOTAL FIRES: | | 194 | 11 | 22 | 8 | 3,438 | 124 | 3,797 |
| TOTAL ACRES: | | 4,860 | 7 | 4,422 | 513 | 42,271 | 9,048 | 61,122 |

| Ten Year Average | Quantity |
|--|-----------------|
| Fires (2016 – 2025 as of today) | 2,081 |
| Acres (2016 – 2025 as of today) | 42,036 |

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

A fast-moving cold front will move through the Northeast and Mid-Atlantic today with light snow. Very cold air will move in for the weekend behind the front, with widespread below zero wind chills. The front will be dry as it moves through the Lower Mississippi Valley and Southeast, followed by brisk and dry northwest winds. Elevated conditions are likely across portions of Florida over the weekend. Record high temperatures will continue across Montana today and move into the northern Plains over the weekend. Temperatures will remain above normal in rest of the West through the weekend, with warmth continuing on the rest of the Plains into next week, as well. Temperatures will cool closer to normal next week in the West as a series of weak storms moves in, with valley rain and mountain snow expected for the northern two-thirds of the West. Most of the eastern US will be dry for early next week, before precipitation arrives to the Midwest and Northeast mid to late next week. A weak storm will move through the southern Plains mid-next week, but precipitation is more uncertain.

Cold air will move into Interior Alaska this weekend with generally dry conditions. A strong storm will move into the western part of the state next week. Increasing moisture is expected across Hawai'i today and into the weekend, with areas of heavy rain and flooding possible. A drying trend is expected next week along with strong trade winds, but windward showers are expected to continue.
