On July 12, a helicopter on contract with the United States Forest Service was involved in an accident on the Gold Mountain Fire outside of Telluride, Colorado. The pilot was fatally injured. The wildland fire community extends its condolences to the friends and family of the deceased.

Two MAFFS C-130 airtankers and support personnel from the 146th Airlift Wing (CA Air National Guard) have been deployed to San Bernardino, CA and Santa Maria, CA to support wildland fire operations nationally.

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Well above-normal temperatures will continue to build across the Great Plains into the upper Midwest and Great Lakes region, with heat spreading into the far Northeast. Afternoon highs of 95-105°F are likely. Breezy winds combined with low relative humidity in the 10-20% range are expected to develop over southern Montana and Wyoming east of the Continental Divide, creating elevated fire weather conditions.

A monsoonal moisture surge will continue to push northward across the Southwest into the northern Great Basin, eastern Oregon, northern California and western Colorado. Scattered wet and dry thunderstorms will form over these areas this afternoon. Additional showers and wet thunderstorms are expected to develop over the Northern Rockies late in the day.

Heavy rainfall with a potential for flash flooding will occur over central Texas, with scattered showers and thunderstorms spreading across much of the Southeast, while south Florida and the Mid-Atlantic remain mostly dry. Severe thunderstorms will be possible during the afternoon and evening across portions of New England.

Mild temperatures will persist across Alaska, with strong southerly surface winds developing through the Alaska Range.
