

**Incident Management Situation Report
Thursday June 4, 2026 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned

Totals

Initial attack activity:	Light (70 fires)
New large incidents:	0
Large fires contained:	2
Uncontained large fires:	4
CIMTs committed:	1
NIMOs committed:	0

TOTAL ACRES:		81,539	29,256	13,858	46,367	2,086,337	210,812	2,468,169

Ten Year Average	Quantity
Fires (2016 – 2025 as of today)	22,270
Acres (2016 – 2025 as of today)	1,267,040

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Above normal temperatures will continue across the Upper Great Lakes and Upper Midwest on Thursday, with a cold front moving through the region during the day. Ahead of the front, south winds 15-25 mph with gusts to 30 mph are expected across parts of Minnesota, Wisconsin, and Michigan, with minimum relative humidity falling to 20-30% during the afternoon hours across Michigan and eastern Wisconsin. Isolated to scattered thunderstorms will develop along and ahead of the front, focused across the northern Plains and Upper Mississippi Valley. Hot and dry conditions will persist across the Southwest and southern Great Basin, with temperatures running 5-10 degrees above normal amid minimum relative humidity of 5-15% across Arizona and the southern Great Basin. Southwest winds 12-25 mph with gusts 25-35 mph across southern and eastern Utah into northwest Colorado will create elevated to locally critical conditions. A moist onshore flow will keep the Pacific Coast of Oregon and Washington relatively cool and damp with scattered showers. Conditions will be drier and warmer east of the Cascades, where afternoon temperatures will warm into the 70s and 80s with southwest winds 10-20 mph. Unseasonable warmth will spread across the eastern United States Thursday, with temperatures 5-10 degrees above normal from the Mid-Atlantic into the Ohio Valley, while dry conditions continue near much of the East Coast as minimum relative humidity falls to 20-35% in the Piedmont. Above normal temperatures are expected across much of interior Alaska Thursday, with minimum relative humidity falling to 20-30% in the Interior.
