

**Incident Management Situation Report
Friday June 5, 2026 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned

Totals

Initial attack activity:	Light (146 fires)
New large incidents:	2
Large fires contained:	0
Uncontained large fires:	6
CIMTs committed:	1
NIMOs committed:	0

TOTAL FIRES:		1,240	340	94	98	28,245	1,494	31,511
TOTAL ACRES:		81,556	29,346	13,858	46,478	2,090,080	213,292	2,474,611

Ten Year Average	Quantity
Fires (2016 – 2025 as of today)	22,418
Acres (2016 – 2025 as of today)	1,279,756

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Elevated fire weather conditions will persist across areas of the Southwest and southern Great Basin due to strong winds, dry conditions, and very warm temperatures. Minimum relative humidity will fall to 5-15% across Arizona, Utah, and Nevada, with southwest winds 10-20 mph and gusts to 30-35 mph across exposed terrain and ridges, with the strongest winds in southern Nevada, southwest Utah, and northwest Arizona. A cold front will approach the Pacific Northwest on Friday, with breezy west winds from the Columbia Basin to Sierra Front creating areas of elevated conditions as minimum relative humidity falls to 10-20%. Unseasonable warmth will spread from Upper Midwest into the Mid-Atlantic and Northeast, with dry conditions along much of the East Coast as relative humidity falls to 20-35%. However, scattered showers and thunderstorms will move through the Great Lakes providing some relief from the recent dry conditions, mainly across Wisconsin and Lower Michigan. Mild and dry conditions will continue across Alaska today, but winds will be lighter across southwest and south-central Alaska, generally less than 10 mph.
