<b>Ten Year Average</b>	<b>Quantity</b>
<b>Fires (2016 – 2025 as of today)</b>	<b>23,478</b>
<b>Acres (2016 – 2025 as of today)</b>	<b>1,397,146</b>

**Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.**

## **Predictive Services Discussion:**

Widespread elevated to critical conditions will persist across portions of the Southwest, Great Basin, and Rocky Mountain areas, as well as California today. Across these areas, variable winds between 10-15 mph with gusts 20-30 mph and relative humidity values between 5-15% are expected, with the highest winds expected across the Front Range in Colorado and large portions of central Wyoming, where gusts may exceed 35 mph. Across central California valleys, Las Vegas, and southern portions of the Southwest, temperatures between 95-110 degrees are expected. In the northern Rockies, widespread rain with high elevation snow will continue to move east across eastern Montana, northern Wyoming, and North Dakota accompanied by high relative humidity values and west winds with gusts of up to 40 mph.

In the eastern U.S., scattered showers and thunderstorms will continue to move east across the Midwest and Northeast. Widespread, higher amounts of precipitation are expected across the Great Lakes, with scattered precipitation expected along the coast. Coastal relative humidity values will be between 35-45%. In Alaska, moderate conditions are expected across the state with areas of scattered thunderstorms and higher areas of precipitation in the southeast.
