

**Incident Management Situation Report  
Saturday June 13, 2026 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (70 fires)
New large incidents:	0
Large fires contained:	1
Uncontained large fires:	10
CIMTs committed:	1
NIMOs committed:	0

## Rocky Mountain Area (PL 2)

### Fire Activity and Teams Assigned Totals

New fires:	6
New large incidents:	0
Uncontained large fires:	2
CIMTs Committed:	1

**South Fork**, Nebraska NF, USFS. CIMT (RM Team 2). Twelve miles west of Crawford, NE. Grass and timber. Active fire behavior with wind-driven runs, group torching and spotting. Numerous residences threatened. Evacuations, area and road closures in effect.

**Bee Hive**, Uncompahgre Field Office, BLM. Fifteen miles northwest of Naturita, CO. Chaparral and grass. Moderate fire behavior with creeping and smoldering. Residences threatened.

Incident Name	Unit	Total Acres	Chge in Acres	%	Ctn	Est	Total PPL	Chge in PPL	Crw	Eng	Heli	Strc Lost	\$\$ CTD	Origin Own

**Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.**

## **Predictive Services Discussion:**

Critical fire weather conditions will occur in several locations today; the first being over southern Utah into northern Arizona and extreme northwest New Mexico due to the forecast of isolated dry thunderstorms after a prolonged dry period. The other location will occur over the Coastal Carolinas where temperatures in the 90s to near 100°F and relative humidity levels ranging from 30-40% will precede scattered afternoon and evening thunderstorms. Any storms which form could produce erratic wind gusts to 45 mph. Elsewhere, the main weather of consequence will be a cluster of strong to severe thunderstorms initiating over central Nebraska and Kansas in the morning and spreading south and east into the lower Missouri Valley during the afternoon and evening. Heavy rain and large hail is expected. Farther west the main story will revolve around hot temperatures with readings forecast above 100°F from the interior valleys and southwest corner of California into southern Arizona and southwest New Mexico. The hot temperatures will combine with minimum relative humidity levels in the teens to lower 20s.

Additionally, over the interior of Alaska, in the Delta Junction area, winds of 20 to 35 mph with gusts to 50 mph will coincide with warm temperatures and relative humidity values in the 20 to 25 percent range.
