**Southern California Area (PL 3)**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
New fires:	27
New large incidents:	0
Uncontained large fires:	7

**Sandy**, Ventura County Fire Department. One mile south of Simi Valley, CA. Brush and grass. Minimal fire behavior with creeping and smoldering. Numerous residences and critical infrastructure threatened. Evacuations, area, road and trail closures in effect.

**Bain**, Riverside Unit, Cal Fire. One mile south of Jurupa Valley, CA. Brush and grass. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Evacuations, area and road closures in effect.

**Verona**, Riverside Unit, Cal Fire. One mile northwest of Hemet, CA. Grass and brush. Minimal fire behavior with smoldering. Residences threatened. Evacuations in effect.

**Foothill**, Santa Barbara County Fire Department. Five miles southeast of New Cuyama, CA. Grass and brush. Minimal fire behavior with smoldering and isolated torching. Numerous residences and energy infrastructure threatened. Area closures in effect.

**Santa Rosa Island**, Channel Islands National Park, NPS. Thirty-three miles southwest of Santa Barbara, CA. Brush, grass and chaparral. Active fire behavior with running, crowning and torching. Structures threatened. Area closures in effect.

**Tusil**, San Diego Unit, Cal Fire. Five miles northeast of Campo, CA. Chaparral, brush and grass. Minimal fire behavior.

**River**, Kern County Fire Department. Fifteen miles northeast of Bakersfield, CA. Grass. Minimal fire behavior. Last report unless significant activity occurs.

**Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.**

## **Predictive Services Discussion:**

Low pressure will move across the Northern Plains bringing wetting rainfall of a quarter of an inch to as much as 2 inches. A low pressure wave and associated stalled frontal boundary to the south & east will also bring showers and thunderstorms across the Southern Plains, much of the South, across the Southeast, across the Tennessee & Ohio valleys, and northward into the Mid-Atlantic states with quarter inch amounts up to as much as 2 inches in some areas. Lightning potential and coverage will be highest across Texas, Oklahoma, and extending eastward along the Gulf Coast into Georgia with some severe thunderstorms possible. Meanwhile, mostly dry conditions are expected for most of the Great Lakes and Northeast. Some relative humidities in the Northeast will be as low as 25% along with locally breezy NW winds across Vermont to Maine. Meanwhile, while most of the Western U.S. will be dry, some isolated mixed wet/dry thunderstorms are possible across portions of California, the Northern Rockies, & portions of Utah & Colorado. The driest conditions will be across the Southwest U.S., Great Basin, and east of the Cascades where minimum relative humidities will range from the single digits to 30%, lowest across the Desert Southwest. Some localized breeziness is also likely in the afternoon to evening hours in these areas.
