Incident Management Situation Report
Sunday November 15, 2026 – 0730 MDT
National Preparedness Level 1

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (32 fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires:	5
CIMTs committed:	0
NIMOs committed:	0

Southern Area (PL 2)

Fire Activity and Teams Assigned	**Totals**
New fires:	23
New large incidents:	1
Uncontained large fires:	4

*** 201W**, National Forests in Mississippi, USFS. Seven miles southwest of New Augusta, MS. Southern rough and timber. Active fire behavior with flanking and backing.

Range 47, National Forests in Mississippi, USFS. Sixteen miles southeast of Hattiesburg, MS. Southern rough. Moderate fire behavior with flanking and backing. Structures threatened.

Bee Haven 2 24-06, Florida Forest Service. Twenty-eight miles northwest of Lake City, FL. Southern rough. No new information.

Campbell Glassman Way, Tennessee DOF. Ten miles north of Caryville, TN. Hardwood litter. No new information.

TOTAL FIRES:		**2,973**	**2,579**	**203**	**390**	**57,146**	**5,612**	**68,903**
TOTAL ACRES:		**436,883**	**3,406,876**	**98,892**	**92,656**	**3,884,504**	**1,572,263**	**9,492,075**

Ten Year Average	Quantity	% of Ten Year Average
Fires (2016 – 2025 as of today)	**53,247**	**129%**
Acres (2016 – 2025 as of today)	**6,530,724**	**145%**

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Dry conditions will persist east of the Mississippi River to the southeast Atlantic coast with minimum relative humidity 25-40% but winds will be light. Moist northwest flow will continue across the Great Lakes and Northeast with scattered rain and snow showers downwind of the lakes in New York and in New England. Dry conditions will continue in the northern Rockies to the northern Plains amid above normal temperatures, while light showers are expected along the northwestern Gulf Coast. The next Pacific storm continues to slowly move into West, with most precipitation along the coast and near/west of the Cascades and Sierra, falling as snow above 4,000 to 7,000 feet. The associated cold front will move east of the mountains overnight and bring precipitation to the western Great Basin and eventually the northern Rockies. Mostly dry and seasonably cold temperatures are expected in Alaska aside from a few flurries, while breezy trade winds persist in Hawai'i with light windward showers.
