

Incident Management Situation Report
Monday October 19, 2026 – 0730 MDT
National Preparedness Level 1

National Fire Activity:

Fire Activity and Teams Assigned

Totals

Initial attack activity:	Light (76 fires)
New large incidents:	0
Large fires contained:	0
Uncontained large fires:	10
CIMTs committed:	0
NIMOs committed:	0

TOTAL FIRES:		2,875	2,503	202	380	53,684	5,354	64,998
TOTAL ACRES:		240,118	3,391,127	98,892	92,626	3,709,897	1,507,663	9,040,324

Ten Year Average	Quantity	% of Ten Year Average
Fires (2016 – 2025 as of today)	49,258	132%
Acres (2016 – 2025 as of today)	6,346,392	142%

Cumulative acres shown in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Dry conditions will continue across the contiguous U.S. today, with the exceptions to the dry pattern isolated to scattered showers and thunderstorms in the Southwest and the Four Corners and isolated showers west of the Cascades. Winds across the country will be most light as well except for locally breezy southwest winds east of the Sierra and breezy south winds on portions of the High Plains. Breezy northeast winds are expected along the Mid-Atlantic and Northeast coast, as well. Very dry conditions with minimum relative humidity as low as 20% will persist in the Lower Mississippi Valley. Above normal temperatures will persist in the northern Rockies eastward to the Midwest, while cooler temperatures are expected in the Northwest and California as onshore flow strengthens. Cooler temperatures and dry conditions will persist in Interior Alaska, but a strong storm is expected to move into southwest and south-central Alaska with areas of heavy rain and strong winds near the coast. Breezy and moist trade winds will continue in Hawai'i with occasional showers.
