### NEXT MEETING:

Working Meeting: Thursday, 18 December 2025, 1100-1300

# National Multi-Agency Coordinating Group

3833 South Development Avenue; Boise, ID 83705

## IMSR Update (Sean Peterson)

PL1, light IA, 86 new starts, 1 uncontained large fire, 1 CIMT providing flooding support in WA.

**Southern Area:** PL1, light IA.

Cave Mountain – 780 acres, 40% contained.

## Predictive Services Update

### Weather Summary (Jim Wallmann)

#### WEATHER SUMMARY

##### Short-term (through Friday)

- A strong atmospheric river with three pulses (today, Wednesday, and Friday) will continue to bring moderate to heavy precipitation for the Northwest into the northern Rockies this week, with precipitation into northern California and the northern Great Basin mid to late week
- Significant flooding will occur again in western Washington, with areas of flooding from northwest Oregon into the Idaho panhandle, while very strong winds occur east of the Divide in Montana and Wyoming
- Mild and dry for the southern half of the West into the southern Plains, with a period of elevated conditions possible late week on the southern Plains
- Milder across the Midwest and Northeast, with more precipitation late this week
- Very cold temperatures continue for Alaska much of the week, with locally strong north winds today

##### Long-term (Saturday through next Wednesday)

- Continued wet in the northern half of the West, with snow levels gradually lowering for the West Coast
- Very dry for the Southwest and southern Plains with well above normal temperatures, and breezy winds are possible early next week for elevated conditions
- Dry for much of the Southeast, as well, continuing the drying of fuels, but elevated conditions due to breezy winds are not expected

Western Australia will experience strong dry easterly wind event later this week.

### Fuels Summary (Steve Larrabee)

NTR
