

D and G Series, End of Life Notification

BK Technologies is committed to supporting our customer needs by designing and manufacturing our products and solutions to the highest quality and technological standards in the Land Mobile Radio (LMR) Industry. This letter serves as a notification that we have begun the process of phasing out our D and G Series Radios and Accessories. These popular products have served the Public Safety LMR Industry for years. However, market and vendor conditions have changed and this has limited our ability to continue manufacturing these products. If you have additional requirements for these products, please be advised, they will only be available for a limited time; while supplies last.

- ***End of production: 11/30/17.***
We will continue to support these products throughout their original warranty period. Product support will be available under commercially reasonable efforts for up to five years after end of production: 11/30/22.
All contractual support agreements will be honored.
