Nationally, there are 58 fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**[Geographic Area daily reports](#)**

**[Understanding the IMSR](#)**

The Federal Emergency Management Agency (FEMA) has activated Emergency Support Function 4 (ESF4) to assist with the wildfires burning in Hawaii.

Two incident management teams, five fire suppression crews, 10 engines and 17 overhead personnel are assigned to large fire support in Canada.

One MAFFS C-130 airtanker and support personnel from the 153<sup>rd</sup> Airlift Wing (Wyoming Air National Guard) and one MAFFS unit from the 302<sup>nd</sup> Airlift Wing (Colorado Air Force Reserve) have been deployed to Klamath Falls, OR to support wildland fire operations nationally.

## **Predictive Services Discussion:**

Hot, dry, and breezy conditions will continue to impact portions of Texas, Louisiana, and Oklahoma. Monsoonal moisture will remain over large portions of the Four Corners states and provide a mix of wet and dry thunderstorms. Remnants of Tropical Storm Eugene will continue to impact the southern two thirds of California and Nevada creating a scattered mix of wet and dry slow-moving storms. Heat wave conditions and a strengthening thermal trough will develop across portions of the Pacific Northwest and northern California and provide well above normal temperatures and locally breezy offshore winds along the Coastal and Cascade Ranges. Warming and drying will continue across the Northern Rockies. Unusually warm temperatures will prevail across the Alaskan interior with isolated to scattered showers and thunderstorms. Heavier concentrations of wetting thunderstorms will be found across the northern and central Plains, upper Mississippi River Valley and large portions of the Southeast.
