Incident Management Situation Report Friday, December 29, 2023 – 0730 MDT National Preparedness Level 1

| National Fire Activity (December 22, 2 Fire Activity and Teams Assigned | 023 – December 28, 2023): Totals |
|--|-------------------------------------|
| Initial attack activity: | Light (228 fires) |
| New large incidents: | 0 |
| Large fires contained: | 1 |
| Uncontained large fires: ** | 0 |
| Area Command teams committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 0 |
| Type 2 IMTs committed: | 0 |
| Complex IMTs committed: | 0 |

Nationally, there are zero fires being managed under a strategy other than full suppression. **Uncontained large fires include only fires being managed under a full suppression strategy.

Geographic Area daily reports

Understanding the IMSR

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

| Ten Year Average | Quantity |
|---------------------------------|-----------|
| Fires (2013 – 2022 as of today) | 58,917 |
| Acres (2013 – 2022 as of today) | 7,145,067 |

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Low pressure will move into California today bringing widespread rain, with snow above 5,000 feet in the Coast Ranges, Sierra, and Transverse Ranges of southern California into Saturday, while lighter precipitation falls across the Northwest. The storm will rapidly weaken as it moves into the Southwest with little precipitation into the southern Rockies. Much of the US will be dry Sunday into Monday with a dry cold front moving south and east from the Plains into the Southeast. Weak low pressure will develop over the southern Plains and Lower Mississippi Valley mid-next week, with widespread wetting rain likely that will spread into the Southeast late next week. After a period of drier weather early next week, weakening Pacific storms will bring moderate precipitation to the West Coast mid to late next week with scattered light precipitation possible into the Intermountain West. Temperatures are likely to remain above normal across much of the West and the northern tier of the US, with cooler than normal temperatures for much of the Southeast the next week. Hawai'i is forecast to have a typical trade wind pattern into next week except for a brief increase of showers possible with a weakening cold front on Monday.
