

**Incident Management Situation Report
Monday, June 19, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity (June 16, 2023 – June 18, 2023):

| Fire Activity and Teams Assigned | Total |
|---|-------------------|
| Initial attack activity: | Light (273 fires) |
| New large incidents: | 7 |
| Large fires contained: | 7 |
| Uncontained large fires: ** | 5 |
| Area Command teams committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 0 |
| Type 2 IMTs committed: | 0 |
| Complex IMTs committed: | 0 |

Nationally, there are five fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

Seventeen fire suppression crews, three incident management teams, fifteen smokejumpers and twenty-five overhead personnel are assigned to support large fires in Canada.

This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.

Active Incident Resource Summary

| GACC | Incidents | Cumulative Acres | Crews | Engines | Helicopters | Total Personnel | Change in Personnel |

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Dry and windy weather will develop across the Southwest, southern Great Basin, and West Slope today ahead of a strong late-season cold front. Moderate to high-risk significant fire potential is forecast, especially across the lower elevations of Arizona and New Mexico. Very hot temperatures, in some places exceeding 110°F, will continue across much of Texas today along with low relative humidity below 20%. Warm and dry conditions will build over the Great Lakes with minimum relative humidity below 35% and moderate significant fire potential. Well below normal temperatures are forecast along the West Coast into much of the Intermountain West, with showers, falling as snow above 6,000 feet, in the Northwest and northern Rockies. A stalled cold front will bring widespread showers and thunderstorms to the Southeast, southern Appalachians, and Mid-Atlantic, with heavy rain and flooding in portions of the Southeast and southern Appalachians.
