

**Incident Management Situation Report
Sunday, June 25, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (82 fires)
New large incidents:	3
Large fires contained:	2
Uncontained large fires: **	5
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	0

Nationally, there are six fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

Seven incident management teams, 22 fire suppression crews, 40 smokejumpers and 27 overhead personnel are assigned to large fire support in Canada.

Active Incident Resource Summary

Southwest Area (PL 3)

Fire Activity and Teams Assigned	Total
New fires:	8
New large incidents:	1
Uncontained large fires:	3

Rico, Las Cruces Field Office, BLM. One mile north of Pinos Altos, NM. Light slash and timber. Minimal fire behavior. Numerous structures and community of Pinos Altos threatened. Communication infrastructure threatened.

Goldwater, Phoenix District, BLM. Twenty miles southeast of Gila Bend, AZ. Grass and brush. Minimal fire behavior.

Post, Southeast District, Arizona DOF. Six miles southwest of Benson, AZ. Grass and brush. Minimal fire behavior.

* **Three Lakes**, Kaibab NF, USFS. Twenty-four miles southeast of Fredonia, AZ. Grass and timber. Active fire behavior with short-range spotting, backing and flanking. Structures threatened. Last narrative report unless significant activity occurs.

Fires (2013 – 2022 as of today)	25,564
Acres (2013 – 2022 as of today)	1,578,394

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

A deep trough will track over the Great Lakes bringing widespread showers and thunderstorms to the area. Scattered showers and thunderstorms will extend from the Lower Great Lakes Region south to the Central Gulf Coast, with severe thunderstorms possible. Scattered showers are also likely across the Mid Atlantic Coastal states into New England and in portions of south Florida. Conditions will be hot, dry, and breezy in southeastern California, the southern Great Basin, the Southwest, the western slopes of Colorado, and much of Texas. Minimum relative humidity is likely to reach 5 – 10% in the Four Corners region where overnight recoveries may be poor. Isolated thunderstorms and showers are likely in the afternoon over the mountains of southern Oregon, central Idaho and into western Montana. In Alaska, thunderstorm activity will continue across the northern Interior and gusty south winds are expected to develop through the Alaska Range passes.
