

**Incident Management Situation Report
Friday, May 12, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (81 Fires)
New large incidents:	2
Large fires contained:	1
Uncontained large fires: **	4
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	1

Nationally, there is one fire being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

Ten Year Average	Total
Fires (2013 – 2022 as of today)	18,494
Acres (2013 – 2022 as of today)	837,285

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Scattered to widespread thunderstorms, including heavy rain, are expected on the northern into the central Plains today into tomorrow. Widespread thunderstorms are expected across much of the southern Plains and Texas through the weekend, with more scattered showers and thunderstorms in the broader Four Corners region over the weekend. Severe thunderstorms are likely across portions of the Plains and Mississippi Valley today and tomorrow, with isolated to scattered showers and thunderstorms across most of the Ohio and Tennessee Valleys, Southeast, central and southern Appalachians, and into the Mid-Atlantic and Midwest through the weekend. Isolated to scattered thunderstorms are likely in parts of New England today, but relative humidity will lower and combine with breezy winds Saturday – Sunday. Hot, unstable, breezy, and relatively dry conditions will spread from Florida into the Carolinas, with daily chances of afternoon thunderstorms. Chances of isolated to scattered showers and thunderstorms will shift and expand west and north in the Intermountain West this weekend, with well above normal temperatures on the West Coast and in the northern Intermountain West.
