

**Incident Management Situation Report
Wednesday, May 17, 2023 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Total
Initial attack activity:	Light (91 fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires: **	4
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0
Complex IMTs committed:	1

Nationally, there are two fires being managed under a strategy other than full suppression.

**Uncontained large fires only include fires being managed under a full suppression strategy.

[Geographic Area daily reports](#)

[Understanding the IMSR](#)

Eleven fire suppression crews, two incident management teams and four overhead personnel have been assigned to large fires in Alberta, Canada.

This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.

Active Incident Resource Summary

Acres (2013 – 2022 as of today)	845,115

Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Dry and windy conditions will continue from northern Minnesota through the Great Lakes into the Northeast leading to elevated and locally critical conditions, with high-risk significant fire potential forecast across New England, eastern New York, northern New Jersey, and northern Minnesota. Isolated to scattered thunderstorms will develop across much of the Intermountain West and High Plains, with the greatest coverage in portions of the Southwest and northern Rockies. Scattered to widespread thunderstorms are expected from the Lower Mississippi Valley to the South Carolina and Georgia coasts. Severe thunderstorms will be most likely in the central High Plains and portions of the Southeast. In Alaska, rain and snow showers will gradually diminish on the west coast and southwest Interior with near normal temperatures and dry conditions for the eastern half of the state.
