

**Incident Management Situation Report**  
**Friday, April 5, 2024 – 0730 MDT**  
**National Preparedness Level 1**

**National Fire Activity (March 29, 2024 – April 4, 2024):**

<b>Fire Activity and Teams Assigned</b>	<b>Totals</b>
Initial attack activity:	Light (546 fires)
New large incidents:	21
Large fires contained:	26
Uncontained large fires:	3
CIMTs committed:	0
NIMOs committed:	0

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

On March 30, a firefighter with the Virginia Department of Forestry passed away while providing initial attack support to the Garland Road incident outside of Gate City, Virginia. The firefighting community extends its condolences to the family and friends of the deceased.

**This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.**

## **Predictive Services Discussion:**

Breezy sustained winds of 20-35 mph and gusts of 30-55 mph amid relative humidity of 7-20% will develop across the central and southern High Plains today and Saturday with widespread elevated to critical conditions. Winds will be southerly today and westerly Saturday, with the westerly winds and low relative humidity continuing across portions of the southern High Plains Sunday. A large upper low will move through the southern half of the West this weekend, with widespread showers for much of the West and snow in the mountains. Breezy and dry northwesterly winds are forecast for the Southeast today into Saturday, but concerns will be mitigated due to green-up and recent precipitation. The upper low in the West will move onto the southern Plains early to mid-next week, with widespread rainfall from the southern Plains into the Southeast, including wetting rain for much of the southern High Plains bringing some relief. Periods of light precipitation are forecast next week from the northern Plains to the Northeast as well, but northern Minnesota and North Dakota are likely to remain dry.
